REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach the specific combination of elements as recited in the instant claims. Although the prior art system teach the production of mental competency exams using multiple question variation they do not include the specific question variations as recited in the claims. For example, the instantly claimed invention requires that the question variant include: for each respective variant question, a question portion which is identical in all variant of the respective variant question and a plurality of answer portions corresponding to respective variants, the answer portions being different for each variant, as recited in independent claims 1 and 11. Similarly the prior art of record fails to show that the variant questions comprise, for each respective variant question, a plurality of question portions corresponding to respective variants, the question portions being different for each variant, and a common answer portion wherein the correct answer is different for each variant, as in claims 6 and 16. Claim 8, includes the limitation of a monitoring responses of each of the test subjects for a pattern probable of unauthorized access to a version of said mental competency test different from the version being administered to the test subject, and interrogating the subject with at least one reserve variant question if the monitoring step detects said pattern of probable unauthorized access. A component for performing similar functions is included in independent claim 17. Although prior art system include similar features, the specifics of these features are not taught or reasonably suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
